

Problem-Solution Fit Canvas

Auto Ticket Classification using FLOW DESIGNER

1. CUSTOMER SEGMENT(S)

Who is your customer?

- Employees / End Users (who raise support tickets)
- Service Desk Agents (who monitor and manage tickets)
- Support Teams (NOC, Helpdesk, Systems, HR, etc.)
- Service Desk Supervisors (who oversee operations)
- ServiceNow Administrators (who maintain the solution)

CS

6. CUSTOMER CONSTRAINTS

What constraints prevent your customers from taking action or limit their choices of solutions?

- Limited time to create detailed ticket descriptions
- Lack of technical knowledge to classify the issue
- High ticket volume causing delays
- Multiple channels (email, portal, phone, chat) with inconsistent information
- Expect faster resolution with minimal follow-up

CC

5. AVAILABLE SOLUTIONS

Which solutions are available to the customers when they face the problem? What have they tried in the past?

- Manual ticket categorization by Service Desk agents
- Basic assignment rules
- User self-classification in ticket form
- IT support via email or phone
- Third-party AI/ML classification tools (alternative)

AS

2. JOBS-TO-BE-DONE / PROBLEMS

Which jobs-to-be-done (or problems) do you address for your customers?

- Help me submit a support ticket easily.
- Help me get my ticket to the right team.
- Help me avoid ticket reassignments and delays.
- Help me get my issue resolved quickly.
- Help me reduce manual workload in ticket classification.
- Help me maintain consistent categorization and prioritization.

J&P

9. PROBLEM ROOT CAUSE

What is the real reason that this problem exists? What is the back story behind the need to do this job?

- Large volume of diverse tickets with unstructured descriptions.
- Lack of standard categorization across teams.
- Manual classification is time-consuming and error-prone.
- Different teams interpret ticket content differently.
- No consistent rules for priority and routing.

RC

7. BEHAVIOUR

What does your customer do to address the problem and get the job done?

- Users describe the issue in their own words.
- Attach screenshots or additional information.
- Select a category (if available) or leave it blank.
- Follow up with Service Desk for status.
- Support teams manually review, categorize and reassign tickets when needed.

BE

3. TRIGGERS

What triggers customers to act?

- Facing an IT issue (e.g., network down, system error)
- Unable to access an application or service
- System outage or performance issues
- New device setup or access request
- Receiving an error message
- Policy or access change requirements

TR

4. EMOTIONS: BEFORE / AFTER

How do customers feel when they face a problem or a job and afterwards?

- **Before:** Frustrated, stressed, confused, loss of productivity
- **After:** Relieved, confident, in control, issue resolved quickly

EM

10. YOUR SOLUTION

Auto Ticket Classification using FLOW DESIGNER

- Automatically classifies incoming tickets based on keywords and conditions.
- Determines the appropriate category and priority.
- Routes tickets to the correct support group.
- Handles unmatched tickets using a fallback queue.
- Reduces manual effort and reassignments.
- Provides audit logs and monitoring.
- Enables consistent, faster and more accurate ticket processing.

SL

8. CHANNELS of BEHAVIOUR

8.1 ONLINE

- ServiceNow Service Desk Portal
- Email (auto ticket creation)
- Chatbot (virtual agent)
- Self-service portal
- Mobile access (if available)

8.2 OFFLINE

- Phone support (Service Desk)
- In-person IT support
- Email with attachments
- Walk-in requests
