

Demonstration of Proposed Features

Date	03 October 2026
Team ID	SWTID-2026-8726
Project Name	Auto Ticket Classification using FLOW DESIGNER
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures the proposed features of the Auto Ticket Classification using FLOW DESIGNER project and records whether each feature has been implemented and demonstrated. The features cover the main automated ticket-classification workflow from ticket creation through routing and fallback handling.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Automatic Ticket Trigger	Automatically starts the Flow Designer workflow when a new Incident or Service Request is created.	Implemented	Yes	Record Created trigger configured for ticket intake.
2	Ticket Content Evaluation	Evaluates ticket description, keywords, requester profile and channel source for classification decisions.	Implemented	Yes	Required ticket information is evaluated by configured workflow conditions.
3	Automatic Classification & Priority	Automatically determines the ticket category and assigns the appropriate priority based on configured rules.	Implemented	Yes	Classification and priority decision logic configured in Flow Designer.
4	Automatic Assignment Group Routing	Routes the classified ticket to the appropriate support group such as NOC, Helpdesk, Systems or HR Operations.	Implemented	Yes	Assignment-group routing is handled through conditional workflow branches.
5	Fallback / Manual Triage	Handles unmatched or ambiguous tickets by routing them to the General Support Triage Queue for manual review.	Implemented	Yes	Fallback path prevents unsupported automatic classification.
6	Audit & Workflow Monitoring	Maintains workflow execution and system/audit information to support traceability and review.	Implemented	Yes	Workflow/log information can be reviewed for processed tickets.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%

Note: The implementation status above represents the prepared project feature set. For the final submission, attach the corresponding Flow Designer, ticket, routing and audit screenshots as demonstration evidence.
