

Project Demo Planning

Date	03 October 2026
Team ID	SWTID-2026-8726
Project Name	Auto Ticket Classification using FLOW DESIGNER
Maximum Marks	1 Mark

Project Demo Planning:

A structured demonstration plan is prepared to present the Auto Ticket Classification using FLOW DESIGNER project clearly. The demo covers the problem statement, solution architecture, workflow configuration, live ticket classification, fallback handling, testing results and final Q&A.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Explain the manual ticket-triage problem, project objective and target service-desk users.	2	Project Team
2	Solution Overview & Architecture	Explain the ServiceNow Flow Designer architecture, trigger, content evaluation, decision matrix and routing flow.	3	Project Team
3	Flow Designer Configuration	Show the Record Created trigger, classification conditions, priority rules and assignment-group branches.	4	Project Team
4	Live Feature Demonstration	Create a sample ticket and demonstrate automatic category, priority and assignment-group routing.	4	Project Team
5	Fallback & Testing Results	Demonstrate unmatched-ticket fallback to General Support Triage Queue and present functional/performance results.	3	Project Team
6	Conclusion & Q&A	Summarize benefits, limitations and future enhancements, followed by evaluator questions.	4	Project Team

Total Planned Duration: 20 Minutes

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain manual triage challenges and the objective of automatic ticket classification.
2	Solution Overview	Explain Flow Designer trigger, content evaluation, decision logic, priority and assignment routing.
3	Live Feature Demonstration	Create a ticket, execute the flow and verify category, priority and assignment group. Demonstrate fallback for an unmatched ticket.
4	Q&A Session	Answer questions about workflow logic, testing, performance, limitations and future enhancements.

Demo Evidence to Prepare:

- Flow Designer workflow screenshot.
- New Incident / Service Request ticket screenshot.
- Automatically classified ticket showing category and priority.
- Assignment Group routing result.
- General Support Triage Queue fallback result.
- Functional / UAT testing results.
